Thanks for purchasing, listening to, downloading and playing my very first all LIVE collection of songs!

These are pretty special to me, in the sense they were recorded over a span of years at different shows around the country, which almost covers every band configuration I've been lucky to carry on the road with me while touring these great United States and beyond.

When stuck at home during the pandemic of 2020, I was fortunate enough to have time to dig into recordings of some of our shows over the last 32 years. It quickly dawned on me, while listening, to make this really cool RETROSPECTIVE STYLE COMPILATION CD for others to enjoy too.

I hope you enjoy our efforts collectively found here in this never-done-before full show from beginning to end, complete with introductions and all, with 14 different band members from 7 different venues making a full-length live show. As always, I love ya and appreciate you. And I mean you... the fan, the radio disc jockey, the promoter, the beginner kid listening to this band's music. I sure hope to see you soon down the road!

Larry
